

TPM++ Consultants and Mentors in World Class Manufacturing

Hire Contract and Terms and Conditions

This is a contract between a customer (the party hiring the equipment) and TPM++ (the owner of the equipment).

The contract is for the hire of Stabo 2-way radios as advertised on the NDCHS.org.uk web site. The radios including chargers can only be hired in pairs.

The quantity of radios is _____ and the hire period is from _____ 2013 to _____ 2013 inclusive.

The cost for the hire is agreed at £____ per radio for the period stated above.

The radios are to be returned by _____ 2013, 3PM. Late returns will be subject to a £__ per day per radio, payable on return of the radios.

These terms and conditions are intended to be fair and straight forward, intended to protect the property of the TPM++, and the obligations of the customer.

The customer will collect and return all the equipment to the TPM++ premises by mutual agreement.

The radios will be supplied in pairs with a dual charger and will be fully charged. The radios may be returned in a discharged state.

A full charge should easily last for a day, depending of course in usage. And the range of the radios is dependent upon the terrain and environment, and so a trial run, free of charge, is highly recommended at the earliest opportunity, so ensure these radios are suitable.

Damage or loss of a radio will be subject to a £30 charge, and damage or loss of the twin charger equipment will be subject to a £15 charge.
